PLEASE CIRCLE YOUR VEHICLES CONDITION

Excellent

Excellent condition means that the vehicle looks great, is in excellent mechanical condition and needs no reconditioning. It should pass a smog inspection. The engine compartment should be clean, with no fluid leaks. The paint is glossy and the body and interior are free of any wear and visible defects. There is no rust. The tires are the proper size and match and are new or nearly new. A clean title history is assumed.

Good

"Good" condition means that the vehicle is free of any major defects. The paint, body, and interior have only minor (if any) blemishes, and there are no major mechanical problems. In states where rust is a problem, this should be very minimal, and a deduction should be made to correct it. The tires match and have substantial tread wear left. A clean title history is assumed. A "good" vehicle will need some reconditioning to be sold at "retail"; however major recondition should be deducted from the value

Most recent model cars owned by consumers fall into this category.

Fair

"Fair" condition means that the vehicle probably has some mechanical or cosmetic defects, but is still in safe running condition. The paint, body, and/or interior need work to be performed by a professional in order to be sold. The tires need to be replaced. There may be some repairable rust damage. The value of cars in the category may vary widely. A clean title history is assumed
